

A leading solar energy provider throughout Upstate New York.

Renewable Power Systems, LLC is comprised of experienced, industry certified professionals who have designed and installed hundreds of solar electric systems utilizing state-of-the-art technology, ranging from residential to large commercial applications. We are your proven, single source, turn-key solution for all aspects of the solar process including solar design, structural and electrical engineering, contract development, zoning, permitting and project management.

Clean, Reliable and Renewable

Solar Power offers municipalities, government agencies and businesses the ability to move towards energy independence, providing the desired alternative solution to your energy needs that is both environmentally beneficial and financially sound.

Predictable Utility Costs – Conserve Energy – Offset Greenhouse Gases

Funding of up to 60% of your entire Solar PV system available through Federal and NYS Incentives and tax credits.
